PROGRAMME

PRE-EVENT PHASE

Do I need to prepare anything before the on-site event?

- **Participation in an Online Survey**
 During the Open Call Application period, we require you to participate in a perception survey on the conference topic. Your responses are crucial as they help us assess and understand the current trends on the topic better. Most importantly, it is an opportunity for us to hear your voices that helps us to design a more relevant programme for you.
- **Virtual Knowledge Building Phase**
 The 15th ASEF Classroom Network Conference integrates a virtual learning experience. After you confirm your participation to the conference, you will go through a 5-6 weeks long knowledge building phase so that you have a basic understanding on the topic as well as a chance to familiarise yourself with all the participants prior to the conference. The virtual learning phase consists of webinars, individual and group tasks. The organisers will share relevant learning resources on the topic with all participants after they register for the conference.
- **Asia-Europe Cultural Exchange**
 We encourage our participants to make the best use of this platform to develop a deeper understanding on each other's culture and region. You may prepare and bring something with you to share with all the participants (e.g., snacks, national dress) from your country that has a national/regional significance.

How does the programme in Japan look like?

Please refer to the [Programme Overview](#) document.

Are there any commitments after the project?

After the conference, participants from the 15th ASEF ClassNet Conference are engaged in various capacities including but not limited to:

- **Participate in an Innovative Teaching & Learning Project**
 During the conference you will be asked to join a project that aims to empower teachers with relevant knowledge and skills required to create timely relevant learning environment for their students. Depending on the nature of the project it could be 6 to 12 months long. There will be an evaluation of all projects and you will be awarded if the project gets selected as one of the top innovative projects.
- **Professional Development Training**
 ASEF might offer possibilities of participating in an overseas training programme and learn from the international experts on the topic of teaching and learning at secondary, high and vocational institutions.
- **Independent Initiatives at National and Community Level**
 We highly encourage you to use the knowledge and skills you have developed from our project to empower others. This way you can create necessary impact at your community and country level.
- **Alumni-led Initiatives**
 We invite all our participants to build networks with our ASEF community, especially with the ASEF ClassNet Teachers' Network and continue the international exchanges of ideas through online and offline platforms.

We always strive to understand the impact of our projects and may get in touch with former participants to conduct impact assessments.

Visual Concept

The "Fortune Teller" has gone by a variety of names across cultures, for example cootie catcher, salt cellars or paku-paku. It used to be a popular paper game and was even played to get answers about the future. The player had 2 moves and 4 choices to come to one of 8 possible pictures or messages about the future.

Times have changed. From human imagination and "Fortunes Tellers", we have shifted to creative human minds and "Artificial Intelligence (AI)" to foresee the future. 2 moves, 4 choices and 8 scenarios have now become 1s, 0s and millions of possibilities.

Which moves and choices do we make out of these millions to design our sustainable future?
